sample genomes
& build phylogeny

←755→

A diagram showing a vertical stack of four colored squares: light blue, light purple, light green, and light cyan. The squares are arranged vertically, with the light blue square at the top and the light cyan square at the bottom. The light blue square is the largest, and the other three are smaller. A curved arrow points from the light blue square down to the light cyan square, with the text "sample genomes & build phylogeny" written along the curve. A dimension line indicates the height of the light blue square as 755.
